

Bank Shot Quick Start Guide for Android

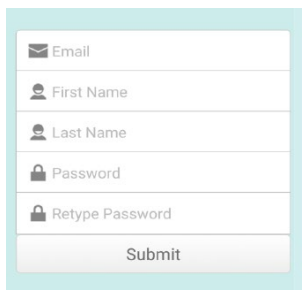

1 Download Bank Shot from the Play Store.

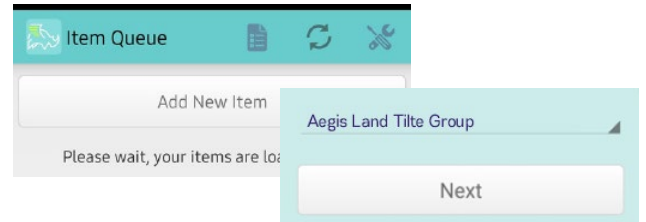

2 “Sign Up” and use Broker Code **3679874**, for Aegis Land Title Group.

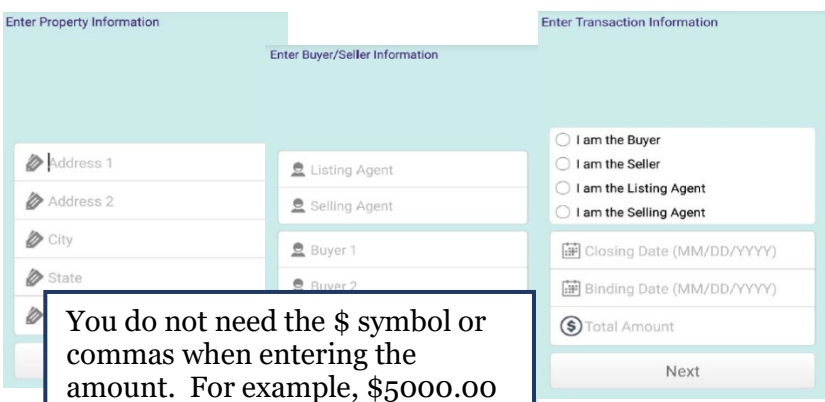

3 Fill out the requested information (your email, name, and a password of your choosing). It will have you log in again afterwards.

4 After you log in, select “Add New Item,” on the next screen, and then “Next” on the following screen.

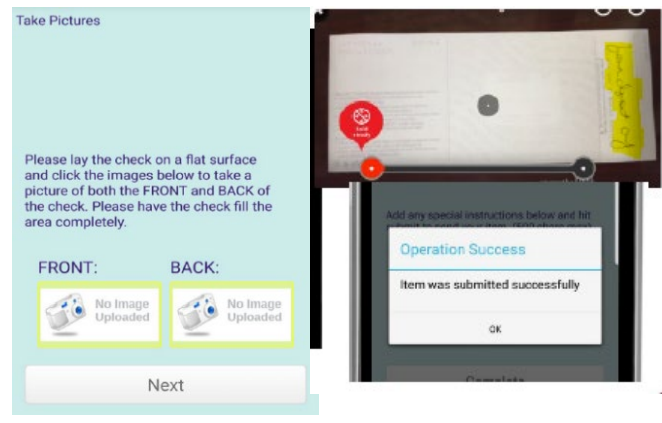

5 Enter in the Property Information and additional information requested on the following screens.

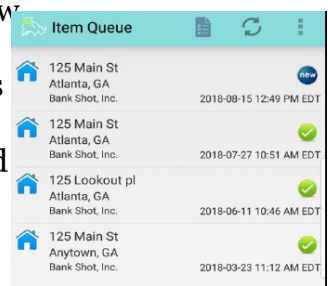

You do not need the \$ symbol or commas when entering the amount. For example, \$5000.00 would just be 5000.00.

6 It will have you take pictures of the front, then the back of the check. Be **SURE** to write “**For deposit only**” on the back of the check in clear, dark writing, where you’d normally sign, or it will reject the check.

7 Once you hit “OK,” it will take you to your Item Queue. Hit the Refresh Button on the top toolbar to show your items.

- Blue means it’s in process
- Red X means it was rejected and you will need to re-deposit
- Green means it was successfully deposited

You can keep the check for your records, and you don’t need to mail it.
